Patty Riemenschneider, Business Manager

COVID-19 Safe Return to In-Person Learning Plan Summer/Fall 2021

Learning Plan Review: This plan will be reviewed every 6 months through 09/30/2023

Masks: Masks are encouraged, but not required except for on school transportation vehicles (mandated by CDC).

Health Screening Process: If you're sick, stay home. All people entering Randolph Public School facilities this summer are expected to perform a self-health screener prior to entering the building (parents will verify with children).

If you or your child has a fever 100.4 degrees or higher; new onset cough or a cough that gets worse; has difficulty/hard time breathing; new loss of taste or smell, you/ they will be required, per MDH decision tree, to test for COVID-19 or have an alternate diagnosis from a medical provider.

Communication: Families are required to report a positive case of COVID-19 to the program director/principal. Families of the program (RCC, athletics, etc.) will be notified of a positive COVID-19 case.

Isolation: If an individual tests positive for COVID-19, he/she must quarantine for 10 days during the infectious period.

Contact Tracing: Families will be notified if their child has been exposed to a positive COVID-19 case. Daily attendance will be documented for each class/activity.

Quarantine: Randolph public school encourages, but does not require, the CDC recommended quarantine period: 7-day quarantine period (test on day 5 or after) return on day 8 or a 10-day quarantine period without a test.

Household Contacts: Any person who lives in the same household as the person that tested positive **MUST** quarantine for at least 7 days, with a test on day 5 or after, returning on day 8. The CDC recommends a 14-day quarantine period for a household (+) contact.

Other Mitigation Strategies: Hand hygiene, cleaning and disinfecting, indoor air ventilation

Mental Health Support: We offer mental health support/services. nicolail@district195.org
